

Washing Line Instructions

1. Remove Washing Line from carry bag
2. Pull up all 4 upper arms ensuring that none of the line is tangled, this is very important as the washing line will not assemble if any of the line is caught up in any way.
3. Place your hands on two of the bottom legs and manoeuvre the legs until the upper arms reach the joints (as shown on the diagram below)

4. Repeat on the other side
5. This will now enable you to screw in the central bracket and until the washing line is taught

Please remember the line **MUST** be tangle free when assembling
